

Aging Health Questions

To ask your veterinarian

1. At what age is my pet considered “senior”?
2. Do older pets have special nutritional needs?
3. What kind of health risks do aging pets have?
4. Does my senior pet need to visit the vet more often?
5. How is a senior pet health exam different from a standard adult pet health exam?
6. Are there any laboratory tests that should be performed on my senior pet in order to detect early onset of potential health issues?
7. Isn't slowing down considered normal for an aging pet?
